

EXCEL MARCO – PROVIDING PROCESS AUTOMATION AND SAFETY SOLUTIONS

Excel Marco Singapore Pte Ltd (Excel Marco) is a premier solutions provider for process automation and safety systems. It is one of the largest automation companies in Asia which specialises in the integration of process control and safety systems in the marine and offshore industry.

An ASMI Member since December 2009, Excel Marco's products and services include process automation and safety systems, power management systems, tank gauging systems and telecommunication systems. The company provides a wide variety of technical services ranging from safety assessment, systems design, engineering programming and logic translation to full turnkey systems integration, on-site testing and commissioning, training and maintenance. Excel Marco's solutions serve oil & gas production platforms, Floating Production Storage Offloading (FPSO) vessels and jack-up drilling rigs.

The Excel Marco group of companies was set up in 2000 with a clear business objective to provide solutions of the highest quality to its customers. It is headquartered strategically in Singapore where some of the world's largest offshore rig and vessel fabrication yards are located. It has regional offices in Abu Dhabi, Rio de Janeiro and Shanghai. The company also has its own Technical Competence Center offering a full range of engineering capabilities and integration facilities to deliver automation systems to many destinations worldwide.

Excel Marco is an ISO 9001:2008 certified company. It is committed to delivering results and exceeding customer expectations. The company has an excellent track record with major customers and end-users globally. Some of its clientele include KeppelFELS, Sembcorp Marine, Single Buoy Moorings, Modec, Dalian Shipbuilding, ExxonMobil, McDermott, Petrobras, and Maritime Industrial Services.

Moving forward, Excel Marco will continue to focus on developing innovative products and solutions that provide better integration, cost efficiency and fast track solutions for its customers. The company has intensified its overseas expansion to Brazil and China in order to tap into the immense oil and gas growth opportunities in those regions.

The company has a team of certified engineers providing customers with project and engineering services for optimum results.

A typical in-house design and build Integrated Control & Safety System.

Excel Marco provides turnkey integrated vessel/marine management, telecommunication, safety systems on the first new-built Super M2 Jack-up Drilling Rigs for Maritime Industrial Services, based in Sharjah.

Excel Marco's Integrated Control & Safety System was installed on FPSO Aseng.
