

HUP HOE ENGINEERING - PRECISION MACHINING EQUIPMENT AND MECHANICAL REPAIR FACILITIES

Hup Hoe Engineering Pte Ltd is a wholly owned local company incorporated in 1977. Then located at Kallang Basin, the company started off with the repair of small passenger ferries and fishing boats, with its machine shop equipped with just a few simple metalworking machines.

Since its inception, the company has been continually expanding in equipment and manpower to meet the ever-changing market requirements. It has grown and modernised over the years. Today, Hup Hoe is located in Pandan Loop, with a well-equipped workshop to handle heavy machineries from both the marine and offshore industries. Its modern workshop is equipped with precision measurement equipment and machining facilities. It also houses advanced state-of-the-art welding equipment from reputable manufacturers.

The company renders its services in its workshop, on site or at anchorages. Its services can be categorised into four types - machining, in-situ machining, mechanical repair and steel fabrication. Its metal machining shop holds all kinds of unique, customised components, with precision machines equipped with lathe swing of up to 84" (2.1m) diameter and 5m length and precision of up to 0.02mm. These machines perform processes that include milling, slotting, drilling, horizontal boring, shaping and honing.

Under in-situ machining, its on-site machining processes include boring up to 7m length, facing, grooving, flange serration and automatic welding within a single setting.

Hup Hoe's mechanical work ranges from overhauling and repairing of internal combustion marine and industrial engines, marine or reducer gearboxes, various kinds of pumps, winches, air compressors to generators and hydraulic components. The company also houses ex-stock of re-conditioned marine diesel internal combustion engines and parts, marine transmission, reducer gearboxes, air compressors, water pumps, cargo

pumps, lubrication oil pumps, fuel oil pumps, generators and electric motors of various makes.

Its steel fabrication services include brazing, T.I.G., M.I.G. and arc welding, plasma cutting, metal fabrication, piping works and modifications in accordance to the customer's design and specifications. The fabrication materials used include carbon steel, stainless steel, aluminium, cast iron and brass alloys.

Hup Hoe's management is a firm believer in the provision of quality and reliable service to all its customers. The company also believes in stringent quality control procedures to meet total customer satisfaction. Looking ahead, the company will be shifting to a new premise by end 2013 with bigger working space that will bring its business to greater heights in the engineering field. Hup Hoe has been an Associate member of ASMI since 1991.

Hup Hoe provides four types of services - machining, in-situ machining, mechanical repair and steel fabrication.

NAV MARINE - PROVIDES EXTENSIVE RANGE OF SHIP REPAIR SERVICES

NAV Marine Pte Ltd was set up in 2005 as a ship repair service provider by Managing Director Billy Liang. The company undertakes all kinds of ship repair services be it afloat, alongside or at anchorage. Its riding team is also ready to join vessels worldwide to carry out voyage repairs.
