**Ascenz Solutions Pte Ltd****Booth No: N2H21-2**

Ascenz Solutions Pte Ltd is Asia's leading provider for maritime operational risk intelligence solutions, providing transparency for regulatory compliance, operational efficiency and risk management.

Smart shipping is essential for data driven decision making in the maritime industry. Ascenz' Shipulse is designed to put that critical shipboard data and analytical tools at your fingertips to achieve performance optimization and increased fuel savings across your fleet. Our award-winning solution suite delivers comprehensive and insightful information for the following modules: bunkering monitoring, fuel consumption monitoring, vessel performance, offshore support activity management, emission compliance and voyage management.

Ascenz seeks to equip fleet managers with the right management tools for system tracking and key metrics monitoring. Recognising the growing importance of IMO's emissions targets and compliance requirements, Ascenz has developed a compliance reporting system which at the same time aligns with standards provided by the EU-MRV regulations.

**Freudenberg Technical Supply (Sin) Pte Ltd****Booth No: N2H21-6**

With more than 23 years of crane spares and service business experiences, we are highly specialised in offering our customers globally with reliable supply of good quality spares and professional crane service especially on the European cranes and as well as some Asian cranes.

With our expanding service team comprising of our own crane engineers and cooperation partners, we are capable of covering all service requirements for cranes and hydraulics throughout the world.

Since our Singapore office Freudenberg Technical Supply (Sin) was set up in 2012, we have successfully strengthened our presence in ASEAN, and have built up more services to support our international clients whose vessels are operating in the Asia region. In 2016, we set up our China Service in cooperation. This further strengthened our position to meet our customers' service requirements when their vessels called in China. At the same time, with our global service presence, we are able to support our China based customers' vessels wherever they are.

**Goodwill Shipping Supply & Services (S) Pte Ltd****Booth No: N2H11-8**

Goodwill Shipping Supply & Services (S) Pte Ltd has been providing marine repair services and procurement solutions to our customers since our incorporation in August 2011. We specialize in providing ad-hoc/urgent repairs, docking arrangements, annual surveys, underwater services and supplies of ship stores and spares globally. Our philosophy is to maintain close contact with our customers and to personally supervise all projects in progress globally.

We specialize in M.E/A.E/G.E/turbocharger/boiler/cooler/valves overhauling, troubleshooting and repairs. Ship owners and managements turn to us for assistance in maintaining, repair and reconditioning their engines due to Goodwill Shipping's ability to provide one-stop solution with any other additional spare or tool in urgent basis. At the same time, Goodwill Shipping also provides annual services such as FFA & LSA inspection, radio survey, underwater survey and hull cleaning globally.

Our worldwide partnership allows us to provide high quality ship stores for all deck/engine/cabin/provision/bond department to cater to merchant fleets. We provide a wide range of genuine or OEM spare parts especially during urgent repairs whether in Singapore or China or overseas. We also provide one-stop warehousing solution for connecting owners' spare to vessel. Our vision is to co-operate with ship owners to deliver excellent services and offer competitive cost with quality services to maintain vessel performance globally.

**Griffin Group International Pte Ltd.****Booth No: N2J11-2**

Griffin Group International Pte Ltd is a global provider of products and services for the filtration industry, utilizing proprietary technology developed from over 40 years of professional experience purifying petroleum-contaminated seawater. In 2003, Griffin developed a revolutionary filtration technology that is used exclusively in Griffin filtration systems. Multi-grade filtration media elements have tested to be 99.8% effective in separating water from fuel and can remove solid contaminants as small as 2 microns in size.

Griffin manufactures its proprietary line of filtration systems as well as OEM/OES products in its own factory. This ISO 9001 certified factory houses production lines for die casting, plastic injection and filtration product manufacturing. Griffin's lab-tested filtration systems help save fuel, reduce maintenance costs, and prolong engine life.

To best serve its customers, Griffin has developed an international distribution network. Its filtration technology and support is available to customers worldwide. Griffin has received ABS Type Approval by the American Bureau of Shipping for its MAS and GFS series of fuel filter water separators. Griffin Filters include fuel filters, hydraulic filters, oil filters and air filters under its sister brand iFIL. Its flagship products, Griffin Fuel Water Separators are ideal for all kinds of the engines especially marine engines.

**Jason Electronics Pte Ltd****Booth No: N2J21-1**

Established since 1976, Jason Electronics Pte Ltd has grown to become a leading provider of integrated solutions for marine communication, navigation and automation systems. With our headquarters in Singapore, we are able to be a full-service provider and our team of highly competent engineers is capable of developing customised system integration as well as a full suite of turnkey and innovative solutions.

To fully meet our customers' requirements, we also specialise in navigation, communication and automation systems, statutory radio surveys, annual performance tests as well as after-sales services. Over the years, we have built a reputation for excellent service by ensuring that our customers' communication and navigational equipment are fixed on time before their vessels leave the port. Delivery service on time has tremendously boosted our customers' confidence in us and the positive feedback has helped us grow as more people got to know about Jason Electronics through word-of-mouth.

Besides Singapore, we have also developed a strong regional presence in international markets such as Indonesia, Malaysia, China, South Korea, Thailand and Vietnam. This enables us to better serve our customers in the various regions with shorter notice required in order to get reliable technical support, thereby improving our competitive edge over our competitors.

**Marinelec Technologies Pte Ltd****Booth No: N2J11-4**

Expertise, development of cutting-edge technologies and 40 years of experience make MARINELEC a leader in alarm, control and monitoring solutions for the safety of people at sea. Designed and manufactured in France, our competitive range of products combines reliability and quality for the benefits of operators of cruising, cargo and offshore vessels.

Client's satisfaction being our utmost priority, our international network of partners and our offices in Singapore and Amsterdam will support you from shipbuilding to ship operations.

Our solutions include:

- **Integrated Alarm Control & Monitoring System:** An integrated solution with dual CPU and fuel consumption monitoring features, our system offers reliable and efficient access to all critical information and control parameters of the ship through its user-friendly HMI.
- **Phoenix V2 – Modular Fire Alarm Solution:** CCS approved and designed for large vessels, Phoenix V2 offers highly reliable fire detection and makes significant cable cost saving thanks to its modular architecture.
- **CL16CPL – Alarm Light Column With Power Line Communication:** Used on the world's biggest cruising vessels, the CL16CPL integrates the technology of power line communication in order to create vertical safety zones and considerably lower cable costs.

**MEP Deck Solutions Pte Ltd****Booth No: N2H01-1**

As part of the MEP Group, both MEP Deck Solutions Pte Ltd and Sin Seng Huat Machinery Manufacture (Jiangsu) Co., Ltd, is a leading one-stop systems provider of towing, mooring and lifting equipment for the marine and offshore industries.

Management, maintenance and supply of anchor chains and wire ropes:

- Mordec anchor chain management program-advanced planning of anchor chain requirement for your fleet using Mordec ACM-MPR advanced algorithms and managing stock availability and supply during your vessel docking.
- Mordec wire rope management program-advanced tracking and planning of wire rope requirement for your fleet using Mordec WRM-MPR advanced algorithms, and planning the inventory of stocks in advance and scheduling transportation and delivery on an on-time basis for your fleet.

Launch of new products:

- Velocity wire rope lubricating system  
Portable device to provide fast and effective lubrication of wire ropes while scraping clean of product build-up and grit and provide tremendous savings in terms of time and expenses.
- Mordec ACP Deck Fittings- Panama chocks, double bitt bollards, closed chocks, pedestal rollers. Designed in compliance with the Panama Canal's Authority modification requirements.

**Nordic Flow Control Pte Ltd****Booth No: N2H21-4**

Established in 1998, Nordic Flow Control is a recognized system integration solutions provider with a strong foothold in the marine and offshore industries. Our headquarter is located in Singapore with production facilities in Suzhou, China. Our systems have been installed in more than 1,000 vessels of various types to more than 100 customers worldwide. Over the years, we have established a strong reputation in providing consistent and reliable solutions to our customers. We turn systems into solutions. Our holistic and comprehensive suite of solutions range from flow, automation and navigation systems, customized to suit any need to fulfil our clients' requirements; not limited to supply and system upgrading, but also to repair and servicing, etc.

Benefits of integrated system solutions: reduces overall software and hardware cost, allows greater degree of redundancy, uniformed interfaces minimise engineering time and operational cost, increases operational efficiency, optimises control of ships and platforms, reduces operator's workload and improves safety level of operations.

Our comprehensive support network which extends across borders and time zones, will certainly ensure your needs are promptly met in the shortest turnaround time. Turning Systems into Solutions.

**O.E. Manufacturing Pte Ltd****Booth No: N2H11-9**

Founded in 1996, OE Manufacturing Pte Ltd is one of the most established hydraulic cylinder manufacturers in the region. For more than 20 years, our customer-centric focus and commitment to quality has garnered the recognition in the hydraulic industries. Our cylinders are in constant demand in industries like marine & offshore, oil & gas, agriculture, waste management, mobile and transportation, palm oil industries as well as other infrastructure projects globally.

Now, with the advent of technology, innovation is absolutely essential. Hence, significant investment has been made on R&D initiatives in O.E. Manufacturing, with a successful breakthrough in developing smart cylinders by incorporating high pressure proximity sensors into hydraulic cylinders and in developing ceramic coated cylinders after a series of tests and research as testament to its R&D capabilities.

O.E. Manufacturing manufactures various types of cylinders - telescopic cylinders, tie rod cylinders, welded series cylinders and other custom-build cylinders. We also provide services from hydraulic cylinder contract manufacturing, custom product development to cylinder replacement, service and maintenance.

Headquartered in Singapore, STSTC (Simulator Technologies Scientific Center Pte Ltd) is a global company. STSTC offers a full range of marine simulators for STCW training and certification. With legacy of scientific research laboratory, STSTC backed up with 20 years experience in simulation technologies development. At STSTC, we help our clients to get state-of-the art simulators certified by DNV-GL and put their training facility to the highest level of training and certification process. We take our clients through concept development and system architecture design and then build the solution using both proprietary hardware and software manufactured in-house. This ensures our clients get the certified system at a competitive pricing and in full compliance to the international regulations.

Our complete product range spreads from desktop software to full mission simulators complexes.

STSTC Products:

- Navigation simulators: Full mission bridge simulator, ARPA/Radar simulator, ECDIS simulator, offshore dynamic positioning simulator, fishing simulator, GMDSS simulator, engine room simulator, cargo handling simulator, VTS simulator.

STSTC Market/Projects:

- STSTC has a global presence with over 1,000 installations worldwide in governmental and private segments: maritime education, fishery institutions, naval education, energy companies.

We bring simulation technologies to the next level of reality. STSTC is a registered trademark in Singapore and other jurisdictions.

**Tat Wai Enterprise Pte Ltd****Booth No: N2J11-3**

Having been in the cruise ship interior decorating sector for more than 30 years, Tat Wai Enterprise Pte Ltd is currently one of the most recognised marine outfitting companies in Singapore. As a one-stop solutions provider, Tat Wai has the capability to take on the project management role for ship owners. We do that by being involved in all aspects of the revamp, beginning with the concept design stage, to the procurement of raw materials, prefabrication, project execution, and project handover.

We have completed a variety of refurbishment projects on many cruise ships, in which our areas of work include accommodation outfitting, furniture fabrication, and the revitalization of public spaces. We have serviced many cruise lines in our years of work, such as Princess Cruises and P&O Australia, etc., many of which come to us consistently for new revamp projects.

Our reputation for quality work and punctuality in project handover has made us the preferred choice for our clients, and has allowed Tat Wai to continue providing premium services to the international cruise industry.
