Ascenz Solutions Pte Ltd is Asia's leading provider for vessel performance solutions, providing transparency for regulatory compliance, operational efficiency and risk management.

Smart shipping is essential for data driven decision making in the maritime industry. Ascenz' Shipulse is designed to put that critical shipboard data and analytical tools at your fingertips to achieve performance optimization and increased fuel savings across your fleet.

Ascenz seeks to equip fleet managers with the right management tools for system tracking and key metrics monitoring, which helps improve productivity and promote transparency in bunker procurements. With knowledge of their vessels on hand, ship owners and operators will be able to make more informed decision making for increased fuel savings and optimized vessel performance.

Our award-winning solution suite delivers comprehensive and insightful information for the following modules: bunkering monitoring, fuel consumption monitoring, vessel performance, offshore support activity management, and voyage management.
