Ascenz Solutions Pte Ltd**Booth No: B7.118**

Ascenz Solutions Pte Ltd is a leading provider for vessel performance solutions, providing transparency for regulatory compliance, operational efficiency and risk management.

Smart shipping is essential for data driven decision making in the maritime industry. With the right management tools for system tracking and key metrics monitoring, ship owners and operators can better equip themselves with knowledge of their vessels and have more informed decision making.

Ascenz' Shipulse is designed to put that critical shipboard data and analytical tools at your fingertips to achieve performance optimization and increased fuel savings across your fleet. Our award-winning solution suite delivers comprehensive and insightful information for the following modules: bunkering monitoring, fuel consumption monitoring, vessel performance, offshore support activity management, and voyage management. Trusted by many big players of the industry, our systems are widely adopted across workboats, container vessels, bunkers, and tankers. To date, the company has installed more than 1,200 mass flow meters and managed over 400 vessels across the world.

Griffin Group International Pte Ltd**Booth No: B7.118**

Griffin Group International Pte Ltd is a global provider of products and services for the filtration industry, utilizing proprietary technology developed from over 40 years of professional experience purifying petroleum-contaminated seawater. In 2003, Griffin developed **MICROBLOC[®]**, a revolutionary filtration technology that is used exclusively in Griffin filtration systems. **MICROBLOC[®]** multi-grade filtration media elements have tested to be 99.8% effective in separating water from fuel and can remove solid contaminants as small as 2 microns in size.

Griffin manufactures its proprietary line of filtration systems as well as OEM/OES products in its own factory. This ISO 9001 certified factory houses production lines for die casting, plastic injection and filtration product manufacturing. Griffin's lab-tested filtration systems help save fuel, reduce maintenance costs, and prolong engine life.

To best serve its customers, Griffin has developed an international distribution network. Its filtration technology and support is available to customers worldwide. Griffin has received ABS Type Approval by the American Bureau of Shipping for its MAS and GFS series of fuel filter water separators. Griffin Filter includes fuel filters, hydraulic filters, oil filters and air filters under its sister brand iFIL. Its flagship products, Griffin Fuel Water Separators are ideal for all kinds of the engines especially marine engines.

The company was founded in 1986 and has since grown into a formidable player in the marine industry. Recognising the need to stay ahead and to be more competitive in a rapidly globalising economy, the company was renamed LFA Global Pte Ltd in 2006. This change in name reflects the direction of the business to grow beyond the shores of Singapore and establish a foothold in the global market. LFA Global runs its office and warehouse from a 22,000 sf modern facility in Singapore and currently has more than 25 staff servicing various customers, from small companies to large enterprises in the marine industry.

The company is one of the leading suppliers and distributors of marine valves, equipment and ship supplies. Customers continue to trust LFA Global because of its high quality of service and ability to deliver. LFA Global has also partnered with the best in the industry and is the official agent and distributor for many major suppliers of marine equipment and ship supplies.

Its wide range of products, the extensive knowledge and expertise of its staff and its unrelenting drive to meet customers' expectations are the key to its success.

Ropes Technology Corporation (Far East) Pte Ltd**Booth No: B7.118**

Ropes Technology Corporation (Far East) Pte Ltd is a ropes distributor in Singapore and we have inventories for a vast variety of ropes, both fiber and steel. We represent and stock products from the most renowned rope manufacturers in the world.

We have been in business for the last three decades and we have kept up with our good reputation of supplying ropes to our customers in a timely, efficient and effective manner. Our company has an excellent image amongst our customers as well as industry members and our customers have got full confidence in us, being loyal through the years as soon as they have worked with us.

Quality is a key concern of our company as well. Ropes Technology Corporation lies in the medium-to-large category and we rank ourselves proudly as the best in Singapore, deriving this confidence from the quality of ropes that we carry. It is due to this emphasis on quality that has led us to approach the most renowned ropes manufacturers around the world. Ropes Technology Corporation is known to be the only rope distributor in Singapore carrying such a vast variety of premium ropes.

Sea Hover Technologies Pte Ltd**Booth No: B7.118**

Since inception in 2002, Sea Hover Technologies has evolved with cutting-edge testing and calibration facilities. Coupled with a highly trained and experienced team, Sea Hover Technologies Pte Ltd is able to deliver high quality services to its customers.

This year, we proudly launched our own product - SHT2002 Ullage Temperature Interface Gauging Device, which is used for tank level measurement on marine vessels. It is user friendly and durable, providing great accuracy with low maintenance cost. It is suitable for hydrocarbons and corrosive liquids application.

Working closely with our partners, we offer sale, service/repair, and maintenance of extensive range of electrical, instrument, and control system for the marine industries. We welcome inquiry from manufacturers that are interested in offering our product as part of their new product. An OEM programme can be tailored to suit most needs. Whether you are looking for a specific design that is produced exclusively for your company or bulk discount, we will work together to find the solution that works best. Conversely, if you have a product (OEM) best suit our company portfolio, we're open for ideas.

STSTC Pte Ltd**Booth No: B7.118**

Headquartered in Singapore, STSTC (Simulator Technologies Scientific Center Pte Ltd) is a global company. STSTC offers a full range of marine simulators for STCW training and certification. With legacy of scientific research laboratory, STSTC backed up with 20 years experience in simulation technologies development. At STSTC, we help our clients to get state-of-the art simulators certified by DNV-GL and put their training facility to the highest level of training and certification process. We take our clients through concept development and system architecture design and then build the solution using both proprietary hardware and software manufactured in-house. This ensures our clients get the certified system at a competitive pricing and in full compliance to the international regulations.

Our complete product range spreads from desktop software to full mission simulators complexes.

STSTC Products:

- Navigation simulators: Full mission bridge simulator, ARPA/Radar simulator, ECDIS simulator, offshore dynamic positioning simulator, fishing simulator, GMDSS simulator, engine room simulator, cargo handling simulator, VTS simulator.

STSTC Markets/Projects:

- STSTC has a global presence with over 1,000 installations worldwide in governmental and private segments: maritime education, fishery institutions, naval education, energy companies.

We bring simulation technologies to the next level of reality. STSTC is a registered trademark in Singapore and other jurisdictions.

TEHO Ropes & Supplies Pte Ltd

Booth No: B7.119

TEHO Ropes & Supplies Pte Ltd was incorporated in 1986 and is now well-established as a major provider of mooring, rigging, lifting and safety systems in Singapore and the surrounding region.

In recent years, we have extended our operations to key maritime centres around the globe with offices and warehouses in Singapore, Houston, Rotterdam and Shanghai and our logistics points in Dubai (UAE), Algeciras (Spain) and Panama.

Established in 2013 and based in Rotterdam, TEHO EuROPE used to serve our European customers, mainly based in the major Northern European ports of Rotterdam, Hamburg, Bremen and Antwerp. In recent years we have extended our reach to other parts of Europe, Middle East and Africa (EMEA), first with the establishment of a stock point in Dubai (UAE), recently followed by another in Algeciras (south of Spain). Currently, TEHO EuROPE is also active in India and Africa. Our core products are fibre rope and wire rope, with ancillary rigging, testing and certification services. Equipped with technical expertise and the latest industrial regulations, our rigging, testing and certification of all kinds of lifting equipment are synonymous with reliability and quality. TEHO EuROPE is ISO-9001 certified.
