Acez Instruments Pte Ltd**Booth No: BG3-09**

Acez Instruments Pte Ltd is an ISO 9001:2008 quality supplier of instrumentation and control equipment in the Southeast Asian region. Established in 1985 and strategically headquartered in Singapore, Acez has transformed into a truly recognised company with the reputation of providing quality instruments, calibration, repairing services and manufacturing.

As a one-stop instrumentation house, Acez provides a wide range of measurement and control products ranging from temperature, humidity, pressure, flow, calibrator, explosion proof and environmental measurement.

With more than 20 years experience in instrumentation business and a strong technical support team, customers are assured of our services. At Acez Group of companies, we have manufacturing facilities (Acez Sensing) to custom-make temperature sensors and level switches. We also provide in-house calibration tests in our "Singlas" national accredited laboratory (Isolab) and on-site calibration and express calibration services. In Acez Group of companies, customer care will always be our top priority.

AMS Marine Pte Ltd**Booth No: BE4-03**

AMS Marine Pte Ltd, part of the AMS Marine Group of companies, is a leading marine, oil & gas company that offers a full suite of engineering services encompassing piping, steelworks, plate heat exchanger, shell and tube heat exchanger, supply of spares, consultancy, electrical motors and non-destructive testing services.

We aim to be the premium marine oil & gas services and solutions provider in the global maritime and oil & gas industry. Our mission is to deliver a suite of services and solutions for customers to ensure that their plant and machinery operate at optimal efficiency. Our company's quality policy is to achieve total customer satisfaction by delivering job excellence through zero defects and timely delivery of all products, services and solutions to maximize and surpass customer expectations.

We are ISO 14001, OHSAS 18001 and bizSafe Star certified company. We embraced a strong culture of documentation and safety in everything we do and we strive to create and maintain an occupational health, safety and environmental management system where our management and staff can work cooperatively in a safe and healthy workplace and at the same time green to the environment.

Beng Hui Marine Electrical Pte Ltd**Booth No: BG3-01**

Established in 1965, Beng Hui Marine Electrical Pte Ltd is a one-stop electrical supplier to marine shipbuilding and repair, on-and-offshore, and oil & gas, petrochemical, industrial and commercial industries worldwide. We are the preferred vendor of many established clientele - ship chandlers, ship owners, ship-management companies, system integrators, shipyards and fabrication contractors.

Our comprehensive inventory from international brand partners allow us to provide a wide portfolio of premium, technically-certified electrical products such as marine & offshore cables, telecommunication & industrial cables, traditional and LED lighting systems, explosion-proof lightings, and electrical accessories. One of the highlights is our in-house range of reliable marine and offshore LED lightings - SOP (Save Our Planet). These lightings will contribute significantly to your energy consumption and offers almost zero maintenance-cutting you back on huge manpower costs and time spent on maintenance and also technical consumables. Feel free to look for us for a complimentary lux and LED ROI calculation or even request for a sample for your vessel or facility.

Our value-added services include total inventory management, quality component integration, MRO sourcing capabilities, price consistency during projects, technical and engineering support – complimentary lux and LED ROI calculation, and global logistics mobility.

Eetarp Engineering Pte Ltd**Booth No: BG4-04**

Eetarp Engineering Pte Ltd is a renowned Singapore-based multi-national engineering company. From our humble beginnings in 1999, we have gained our clients' confidence by providing them with the latest technology and reliable solutions in the fields of electrical safety, power quality and energy management for their mission-critical and high-value investments.

Our solutions are to help our clients maintain the highest level of electrical safety, reliable power supply quality and reduce energy consumption. We provide a whole range of products ranging from discrete devices to integrated solutions and from portable to permanently installed web-based monitoring and reporting, complete with data storage and database management systems to meet every unique requirement of our clients.

Our clients span the whole spectrum of industries from land-based data centres, hospitals, semi-conductor manufacturing plants, power generation and electrical sub-stations, commercial buildings, electrical vehicles, solar installations to offshore oil rigs, FPSO, cruise ships and naval ships. In return for our clients' continued support, we share with them our knowledge and expertise by conducting regular classroom and onsite trainings as well as technical seminars.

Jason Electronics (Pte) Ltd**Booth No: BG4-01**

Established since 1976, Jason Electronics Pte Ltd has grown to become a leading provider of integrated solutions for marine communication, navigation and automation systems. With our headquarters in Singapore, we are able to be a full-service provider and our team of highly competent engineers is capable of developing customised system integration as well as a full suite of turnkey and innovative solutions.

To fully meet our customers' requirements, we also specialise in navigation, communication and automation systems, statutory radio surveys, annual performance tests as well as after-sales services. Over the years, we have built a reputation for excellent service by ensuring that our customers' communication and navigational equipment are fixed on time before their vessels leave the port. Delivery service on time has tremendously boosted our customers' confidence in us and the positive feedback has helped us grow as more people got to know about Jason Electronics through word-of-mouth.

Besides Singapore, we have also developed a strong regional presence in international markets such as Indonesia, Malaysia, China, South Korea, Thailand and Vietnam. This enables us to better serve our customers in the various regions with shorter notice required in order to get reliable technical support, thereby improving our competitive edge over our competitors.

KTL Offshore Pte Ltd**Booth No: BH3-07**

With a history of more than 100 years in the rigging business, the KTL Offshore Group of companies is one of the most trusted in the lifting industry with facilities located in Singapore, Malaysia, United Arab Emirates and Indonesia. Our mission is to build the largest synthetic and steel slings the world's heavy lift industry demands; to the highest quality standards; as well as to be a trusted solution provider in any industry that requires our services and products related to their rigging, lifting and mooring needs.

Our new KimLift™ slings have set a new standard in synthetic slings used for heavy lifting. We designed, manufactured and tested HMPE slings with an MBL of 5,440 MT used for lifting the topsides on a critical project. All slings were proof load tested on our 3000 MT test bed and delivered exceptional length control.

In addition to advancing the technology of synthetic sling production, during the year KTL Offshore Pte Ltd has also completed the delivery of several huge cable laid steel wire rope slings and grommets for the Ivar Aasen, Gina Krog and Mariner projects: the longest cable-laid slings were around 172m in length with an individual weight of 70 MT. In addition to manufacture of slings, KTL Offshore also distributes some of the world's premium brands such as Crosby, Usha Martin, Kiswire, DSR and Koronakis.

Quasi-S Pte Ltd**Booth No: BE4-06**

Quasi-S Pte Ltd was established in Singapore in 2001 to supply scientific equipment to the engineering, chemicals, refineries, oil & gas, R&D, forensic, materials research and many other industries.

We have 3 active laboratories strategically located to provide rapid turnaround needs for customers. Accredited with ISO 17025, they are operated by skilful chemists, metallurgist and lab technicians. As a one-stop lab-service solution, we can conduct FA, reliability testing in accordance to international standards such as ASTM, DIN, IEC, JEDEC. In addition, our personnel can be deployed to perform on-site analysis where situations require. With a special focus on metallurgy analysis, we help to provide important information about the structure and properties of metal and alloy samples.

Our services and equipment include macroscopic examination (SEM), microscopic examination (visual and optical), chemical analysis (EXD, PMI, XRF, ICP), mechanical analysis (bend, hardness, tensile, weld, fracture and charpy impact test) and in-situ metallurgy. Our areas of expertise are: failure analysis (corrosion processes and stress corrosion cracking, fatigue, brittle and ductile fracture mechanisms, wear mechanisms, abrasive and cavitation erosion) and consultation (root cause of investigation).

Ropes Technology Corporation (Far East) Pte Ltd**Booth No: BG4-03**

Ropes Technology Corporation (Far East) Pte Ltd is a ropes distributor in Singapore and we have inventories of a vast variety of ropes, both fibre and steel. We represent and stock products from the most renowned rope manufacturers in the world.

We have been in business for the last three decades and we have kept up with our good reputation of supplying ropes to our customers in a timely, efficient and effective manner. Our company has an excellent image amongst our customers as well as industry members and our customers have got full confidence in us, being loyal through the years as soon as they have worked with us.

Quality is a key concern of our company as well. Ropes Technology Corporation lies in the medium-to-large category and we rank ourselves proudly as the best in Singapore, deriving this confidence from the quality of ropes that we carry. It is due to this emphasis on quality that has led us to approach the most renowned ropes manufacturers around the world. Ropes Technology Corporation is known to be the only rope distributor in Singapore carrying such a vast variety of premium ropes.

SSB Cryogenic Equipment Pte Ltd**Booth No: BF3-04**

SSB Cryogenic Equipment Pte Ltd (SSBCE), a subsidiary of Sing Swee Bee Group, provides short and long-term rental and leasing of ISO tanks to clients in the gas and marine industry. Over the years, we have established ourselves as the owner and lessor of the largest fleet of T75 ISO tanks in SEA, providing transportation, distribution, and the supply of cryogenic and hydrocarbon bulk liquid (LNG, ethylene, LAR, LCO2, LN2O, LIN, LOX, LPG, ammonia, refrigerants) to local and regional markets. We have also encompassed the supply of industrial cylinders, valves, industrial gas-related products and cryogenic equipment as part of our business services.

We specialise in cryogenic and marine solutions, such as purging, non-destructive testing and turnkey project solutions. Being one of the few companies in the world certified to render global test for GTT's membrane containment systems, we extend our project diversity and capabilities to provide retrofits and repair service for LNG membrane vessels, as well as construction of small-scale LNG membrane vessels and precast storage tanks in SEA, Australia and New Zealand.

We continue to place a strong emphasis on expanding our downstream portfolio for LNG-related activities such as LNG bunkering, small and micro-scale LNG supply chain solutions in SEA and Australia.

Viscoy Pte Ltd**Booth No: BG4-07**

Viscoy Pte Ltd is a specialist supplier in Remote Visual Inspection (RVI) equipment. RVI or Visual Testing (VT) is the simplest but an integral technique in Non-Destructive Testing (NDT). With the push to extend the useful life of aging assets, RVI is playing an increasingly important role in both predictive and preventive maintenance regimes. This can be challenging, especially if the area of interest is small, inaccessible or even hazardous.

We offer a wide spectrum of visual inspection equipment and customised solutions to overcome your visual inspection challenges. Our products range from small diameter videoscopes for inspection of the narrowest and most inaccessible cavities, push cameras and remote controlled robotic crawlers for long range inspections of pipeline networks, to powerful pan-tilt & zoom camera systems for the inspection of large confined spaces.

In addition to standard systems, Viscoy also offers bespoke inspection solutions designed to address unique inspection requirements of our customers.
